

## CONTEMPORARY ENDOVASCULAR MANAGEMENT SERIES

*Focused, Relevant, Practical*

### Chronic Venous Insufficiency VOLUME 1

Chronic Venous Insufficiency, the first volume in the Contemporary Endovascular Management series, presents a current, succinct review of the rapidly evolving field of venous disease. In recognition of the significant effects of venous disease on patients and the quickly changing modes of therapy in the field, this volume fulfills the need for a comprehensive assessment of the treatment paradigms and innovative techniques now available. Volume 1 examines varicose veins, chronic venous reconstructions, and arteriovenous malformations from initial presentation through imaging and diagnosis to general and advanced therapies. As leaders in their field, the authors of Chronic Venous Insufficiency focus their contributions on current and relevant research and facts, specifically aiming to close knowledge gaps as well as to provide essential information for the practicing physician, the trainee, and the midlevel provider.

**SERIES:** Contemporary Endovascular Management    **TITLE:** Chronic Venous Insufficiency  
**PUBLISHER:** Cardiotext Publishing    **PUBLICATION DATE:** May 2011  
**ISBN:** 978-1-935395-09-6    **PRICE:** \$89.00  
**BOOK INFORMATION:** Hardcover, 7"x10", full color interior, 240 pages, 80+ figures  
**WEB:** <http://www.cardiotextpublishing.com/titles/detail/9781935395096>

**EDITOR Mark G. Davies MD, PhD, MBA,** Vice Chairman, Finance and Administration, Department of Cardiovascular Surgery; Program Director, Vascular Surgery Fellowship and Integrated Vascular Surgery Residency; Director of Research and Education, Methodist DeBakey Heart & Vascular Center, The Methodist Hospital, Houston, Texas; Senior Investigator, The Methodist Hospital Research Institute; Professor of Cardiovascular Surgery, Weill Cornell Medical College, New York, New York

**EDITOR Alan B. Lumsden MD,** Chairman, Department of Cardiovascular Surgery; Medical Director, Methodist DeBakey Heart & Vascular Center, The Methodist Hospital, Houston, Texas; Professor of Cardiovascular Surgery, Weill Cornell Medical College, New York, New York

# Chronic Venous Insufficiency

## TABLE OF CONTENTS

### Part 1: Varicose Veins

#### Overview of Part 1

1. Overview of Therapy for Varicose Veins *Joann M. Lohr*
2. Chronic Venous Insufficiency: Comprehensive Treatment Guided by Investigation and Classification *Michael A. Vasquez and Carolyn E. Munschauer*
3. Duplex Imaging of Varicose Veins *R. Eugene Zierler*
4. The Role of Computed Tomography and Magnetic Resonance in Venous Imaging *Jean Bismuth, Dipan Shah, and Christof Karmonik*
5. Endovenous Radiofrequency Ablation of the Saphenous Vein: Mechanism of Action, Procedural Technique, and Review of Clinical Outcomes *Elizabeth Acquista and Alan M. Dietzek*
6. Laser Ablation: Indications, Techniques, and Outcomes *Robert J. Min*
7. Recommendations for Sclerotherapy of Spider Veins, Reticular Veins, and Varicose Veins *Joann M. Lohr and Angela N. Fellner*
8. Foam Sclerotherapy for the Treatment of Chronic Venous Insufficiency *Javier E. Anaya-Ayala, Sofia Gonzalez-Morales, and Mark G. Davies*
9. Perforator Veins: Indications, Techniques, and Outcomes *Nyla Ismail and Eric K. Peden*

### Part 2: Chronic Venous Reconstructions

#### Overview of Part 2

10. Stenting of Chronic Obstruction: Indications, Techniques, and Outcomes *Peter Neglén*
11. Venous Bypass: Indications, Techniques, and Outcomes *Joseph J. Ricotta II and Peter Gloviczki*
12. Valve Disease: Is It Really Important? *Kevin G. Burnand*
13. Valve Replacement Therapy: Indications, Techniques, and Outcomes *Dušan Pavčnik*
14. Valve Reconstruction Therapy: Indications, Techniques, and Outcomes *Peter Neglén*

### Part 3: Special Circumstances

#### Overview of Part 3

15. Nutcracker Syndrome *Joseph J. Naoum*
16. Pelvic Congestion Syndrome *Colleen J. Moore and Robert B. McLafferty*

### Part 4: Venous Malformations

#### Overview of Part 4

17. Venous Malformations: Pathophysiology, Classification, and Incidence *Francis Marshalleck and Michael C. Dalsing*
18. Arteriovenous Malformations *Alan B. Lumsden*

## CONTEMPORARY ENDOVASCULAR MANAGEMENT

Edited by Mark G. Davies and Alan B. Lumsden

The Contemporary Endovascular Management series is designed to be a focused, relevant, and timely review of the modern aspects of imaging and intervention in specific vascular beds. Each volume in the series addresses one vascular bed and equips readers with the current information necessary for vascular practice using a clear and easy-to-access format.

Volume 1 Chronic Venous Insufficiency

Volume 2 Venous Thromboembolic Disease

Volume 3 Forthcoming

Volume 4 Forthcoming
