

Vascular Disease: Diagnostic and Therapeutic Approaches

Michael R. Jaff, DO, FACP, FACC, FAHA, Associate Professor of Medicine, Harvard Medical School; Medical Director, Vascular Center, Massachusetts General Hospital, Boston, Massachusetts; Past President of the Society for Vascular Medicine (SVM)

Christopher J. White, MD, FSCAI, FACC, FAHA, FESC, Professor of Medicine, System Chairman for Cardiovascular Diseases, The John Ochsner Heart and Vascular Institute, Ochsner Medical Institutions, New Orleans, Louisiana; President-Elect of The Society for Cardiovascular Angiography and Interventions (SCAI)

Internationally recognized authorities in vascular medicine Michael R. Jaff and Christopher J. White have joined with leading experts to produce a book that comprehensively and uniquely addresses vascular disease. The editors' clinical approach, combined with the work of contributors nationally renowned in their respective fields, make this work useful and practical to both clinicians and interventionalists alike.

Vascular Disease: Diagnostic and Therapeutic Approaches bridges vascular and endovascular medicine to provide practicing physicians of multiple backgrounds – as well as trainees, students, and anyone involved in the treatment of vascular diseases – an essential overview of the diagnostic approaches and state-of-the-art treatments of arterial and venous diseases.
